PROFESSIONAL SUMMARY

Data Analyst with hands-on experience using SQL, Python, Pandas, Tableau, and statistical analysis to solve business-focused data problems. I enjoy turning complex datasets into clear insights that support better decisions. My background in Electronic Engineering has strengthened my analytical thinking, problem-solving, and ability to work with technical information. Currently seeking a Data Analyst opportunity where I can contribute to data-driven teams while continuing to grow professionally.

TECHNICAL SKILLS

- **Programming:** Python, SQL
- **Libraries:** Pandas, NumPy, Matplotlib, SciPy
- **Data Analytics:** Data Cleaning, EDA, Statistical Analysis, Hypothesis Testing, A/B Testing, Conversion Analysis
- **Visualization & BI:** Tableau, Excel, Plotly
- **Tools:** Jupyter Notebook, Git, GitHub, VS Code, Streamlit
- **Currently Learning:** Power BI, Machine Learning

CORE COMPETENCIES

Analytical Thinking | Problem Solving | Attention to Detail | Critical Thinking | Project Coordination | Time Management | Team Collaboration | Adaptability | Continuous Learning

SELECTED DATA ANALYTICS PROJECTS

CallMeMaybe — Operator Efficiency Analysis

Python | Pandas | SciPy | Tableau | Statistical Analysis

- Analyzed telecom operator performance using call activity, missed calls, and response-time metrics.
- Classified 1,133 operators by efficiency level and identified 41 high-priority cases requiring attention.
- Built an interactive Tableau dashboard to communicate KPIs, performance patterns, and business recommendations.

GitHub Repository

Recommender System A/B Test Analysis

Python | Pandas | SciPy | A/B Testing | Statistical Analysis

- Evaluated whether a new recommendation system improved conversion across the product funnel.
- Identified experiment limitations including sample imbalance, cross-test contamination, and incomplete observation windows.
- Used two-proportion z-tests to compare conversion rates and identified a statistically significant decline at the product-page stage.

GitHub Repository

Book Market SQL Analysis

SQL | PostgreSQL | Python | Pandas | SQLAlchemy

- Queried a relational PostgreSQL database containing books, authors, publishers, ratings, and reviews.
- Used JOINS, subqueries, GROUP BY, HAVING, and aggregate functions to answer business-focused questions.
- Identified publishing trends, highly rated authors, leading publishers, and user engagement patterns.

PROFESSIONAL EXPERIENCE

Flooring Installation & Finishing Technician

Les Planchers CL Inc. | Montreal, QC, Canada

September 2019 – Present

- Independently manage flooring installation and finishing projects from preparation through final delivery, ensuring quality standards and deadlines are met.
- Coordinate daily logistics, including tools, equipment, materials, and scheduling across multiple job sites.
- Communicate directly with customers to answer technical questions, provide recommendations, and ensure client satisfaction.
- Train and mentor new team members on technical procedures, safety practices, and quality standards.

EDUCATION

Bachelor of Electronic Engineering (In Progress)

Universidad Pontificia Bolivariana (UPB)

Bucaramanga, Colombia

Data Analytics Bootcamp

TripleTen

Completed 2026
